```
public static bool IsPrevInstRunning()
{
    Int32 _isProcessRunning;
    _isProcessRunning = System.Diagnostics.Process.GetProcessesByName(
        System.Diagnostics.Process.GetCurrentProcess().ProcessName).Length;

    if(_isProcessRunning != 1)
    {
        return true;
    }
    else
    {
        return false;
    }
}
```
